DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to an apparatus and method for sensing data, for converting the data, and for wirelessly transmitting the data in response to a remote command.

Group II, claim(s) 10-18, drawn to an apparatus and method for monitoring utility usage data with a means for determining utility usage by monitoring reflected radiation from a rotating means.

Group III, claim(s) 19-30, drawn to a transmitting protocol for a data gathering system.

Group IV, claim(s) 31-39, drawn to a method of collecting data and transmitting a short message in a control channel.

Group V, claim(s) 40-48, drawn to a device and method of coupling telecommunications equipment with a digital personal communications system.

2. The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I relates to a method and device for sensing data and wirelessly transmitting the data in response to a command request from a remote device. Such features are not recited in the other claims. Group II relates to a device and method of monitoring utility usage by means of a rotating means for reflecting radiation. Such features are not recited in the other claims. Group III relates to a method of transmitting data via a particular protocol. Group IV relates to a method of collecting data, composing a message and transmission of the message using a personal communications system protocol. Group V relates to a method and device for coupling telecommunications equipment to a personal communications system. None of the other claims recites features for such a device.

Art Unit: 2635

3. A telephone call was made to Paul Hansra on January 30, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K Wong whose telephone number is 703-305-8884. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Horabik can be reached on 703-305-4704. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9314 for regular communications and 703-872-9314 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-305-4700.
